

Made Rite's FE Inverted Seam Innerspring Dorm Collection

Made Rite Bedding's **FE Inverted Seam Innerspring Dorm mattresses** offer strong support and durability for institutional needs. The side seam construction is engineered to help prevent fluid penetration & interior contamination of the mattress. It also reduces the potential for infestation by bed bugs, lice and other parasites. They feature breathable covers that have anti-microbial, moisture & stain resistant properties that provide outstanding comfort and easy maintenance.

The FE Inverted Seam Innerspring provides the following benefits:

- ❖ **Exceptional Durability & Comfort**
 - **Innerspring unit** is encased with extra firm perimeter foam for solid edge support
 - **Upholstery** includes high-density convoluted foam layers to prevent sagging
 - **Dual firmness construction** allows for choice of plush firm on one side and extra firm on the other side to satisfy individual preferences.
- ❖ **Cover** is **SoFlux OX®**, a breathable, polyurethane coated nylon fabric
 - **Anti-Bacterial** protection helps prevent growth of mildew and fungus
 - **Bio-Hazards** – the side seam construction, combined with the antimicrobial properties of the SoFlux OX® cover, resists the passage of biohazards to the inner mattress areas.
- ❖ **Safety**
 - Inner seam design has no tape edge, eliminating the main hiding place where **bed bugs** may reside and lay eggs & greatly reducing the risk of parasite infestation on the mattress.
 - **Flammability** – The Inverted Seam Innerspring Collection is manufactured with Integrity 30® Fire Barrier system to conform to the full scale burn tests of Federal CPSC 16 CFR PART 1633, California Technical Bulletin #129 and Boston Fire Department (BFD) IX-11.
